

Armadi Componibili Serie SS

SERIE SS

Gli armadi della serie SS sono gli armadi componibili IP55 dedicati all'automazione industriale che permettono di essere liberamente configurati a seconda delle esigenze applicative.

SS1 è l'armadio in configurazione porta singola e SS2 è l'armadio in configurazione porta doppia.

I punti di forza quali robustezza, versatilità e facilità di utilizzo rendono la serie SS la soluzione ottimale e competitiva per ogni tipologia di applicazione.

L'utilizzo dell'armadio SS può essere sia stand-alone che in configurazione "batteria" dove non necessita di nessun accessorio aggiuntivo grazie alla sua conformazione realizzativa studiata grazie alla decennale esperienza nelle soluzioni enclosure metalliche.

SERIE SPC

Gli armadi per computer serie SPC, nati dalla serie componibile SS, sono la versione dedicata alle esigenze di applicazioni porta computer per applicazioni industriali.

Mantenendo il grado di protezione IP55 sono completamente compatibili con tutti gli accessori e prodotti della serie SS ed offrono inoltre la possibilità di essere accoppiati alla serie componibile SS.

Dati tecnici:

Telaio: ricavato da profili brevettati di spessore 15/10, con foratura passo 22. Tetto e fondo saldati

Porta Cieca: in lamiera di acciaio di spessore 20/10 con telaio dubulare zincato di irrigidimento (Reversibile).

Porta Vetro: in lamiera di acciaio di spessore 20/10 con oblò in vetro temperato (Reversibile)

Pannelli posteriori, tetti, fondi, e chiusure fondi ingresso cavi: in lamiera di acciaio spessore 15/10

Colore: standard RAL7035 bucciato con polveri termoindurenti, Zoccolo RAL 9005

Grado di protezione:

- IP55 in accordo con IEC EN62208 – EN60529
- Grado di protezione garantito da guarnizione poliuretana bi-componente
- Resistenza grado IK10 in accordo con IEC EN 62208 – EN 50102 - IK09 per versione con porta trasparente
